

Dear Senator Grassley,

The passage of the the bipartisan *Compassionate Access, Research Expansion, and Respect States (CARERS) Act* (S. 683) would allow state medical marijuana programs to continue without federal interference, move marijuana from Schedule I to Schedule II of the Controlled Substance Schedule, remove the marijuana compound Cannabidiol (CBD) entirely from the schedule, create access to banking services for marijuana businesses in legal states, eliminate the DEA-mandated "NIDA-monopoly" that prevents researchers from obtaining marijuana for clinical studies, and allow Veterans Health Administration physicians to write recommendations in states that have established a medical marijuana program.

Not allowing this piece of legislation a vote, is blocking the democratic process, and going against the 78% of lowans who want medical marijuana to be available as a treatment option. As a citizen of Iowa, I ask that you allow the CARERS Act a vote in the Senate Judiciary Committee.

Sincerely,
