

PATIENT ADVOCACY  
HARMONIZING MEDICAL CANNABIS  
POLICY AND REALITY

# UNITY CONFERENCE 2016

**March 21st**  
9:00am-11:30am

Loews Madison Hotel  
Washington, D.C.

## Why Attend Unity 2016 Continuing Medical Education Conference?

"Whether or not doctors or other health care providers have any intention of recommending medical marijuana for patient care, they all need to be well educated in this clinical area because their patients will be seeking their expert advice and guidance for this important medication. Further, some patients may already be utilizing medical marijuana and doctors and other health care providers will need to be aware of the physiological effects of marijuana as well as potential drug interactions. As such, expertise in medical marijuana will be paramount for most doctors, pharmacists, nurses, and other health care providers if they wish to continue to be that respected guide for their patients' health care." - Stephen B. Corn, MD

**\$249**

for both live & on  
line CME

**4.5 CME AMA PRA Category 1  
Credits™ on Medical  
Cannabis**
